

FIG. 1 is a perspective view of a medical device 10, including a catheter 14, a handle 15, a proximal connector 20, a distal connector 30, and a distal catheter 32. The device 10 is shown in a longitudinal orientation, with a transverse direction indicated by arrow 12. The handle 15 is connected to the proximal connector 20, which is connected to the distal connector 30. The distal catheter 32 is connected to the distal connector 30. The proximal connector 20 includes a proximal flange 34 and a proximal seal 44. The distal connector 30 includes a distal flange 36 and a distal seal 46. The distal catheter 32 includes a distal tip 38 and a distal lumen 40. The device 10 is shown in a longitudinal orientation, with a transverse direction indicated by arrow 12.
